1. Claims 1-16 is present in this application, which is a divisional of Serial Number 10/095,428 filed March 13, 2002, now, U.S. Patent 6,777,219.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-5 [claim 5 which is dependent upon claim 4] and claim 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "the preservative" as claimed in claim 1, but there is insufficient antecedent basis for this limitation in the claim.

Claim 4 recites "any conventional" preservative which renders the claim vague and indefinite as to the scope since the expression is not defined as to what is conventional and what is non-conventional

Claim 11 is vague and indefinites for the term "conventional" since the specification does not define the scope of the term as to what is conventional and what is not conventional in the art.

3. Claims 1-3, 6-10 and 12-16 are allowed. No art has been found to anticipate the claims as well as no art has been found to suggest or motivate one of

ordinary skilled in the art to employ the processes of treating animal skins with the alkaline proteases obtained from *Conidiobolus coronets*.

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
